HCS LAN Copper Cables Compliance to the European Union Directive 2002/95/EC (RoHS)

As of 1 August 2005 all HCS LAN Horizontal bulk cables will fully comply to EU-Directive 2002/95/EC (RoHS).

1. Background

This statement is based on the following EU Directives:

1.1. EU-Directive 2002/95:

Restriction of use of hazardous substances in electrical equipment, (RoHS) to become effective as of 1 July 2006.

1.2. Unofficial note of the Technical Adaptation Committee on the WEEE and RoHS Directives dated 16 March 2005 - Draft Decision establishing the RoHS Directive maximum concentration values (MCV).

At the date of publication, the following MCV were proposed:

Lead: 0.1% = 1000 ppm Cadmium 0.01% = 100 ppm Mercury 0.1% = 1000 ppm

Chromium VI 0.1% = 1000 ppm PBB 0.1% = 1000 ppm PBDE 0.1% = 1000 ppm

HCS monitors closely the relevant EU publications and in case of need updated statements will be issued.

1.3. EU-Directive 2002/96:

Waste electrical and electronic equipment, WEEE, to become effective as of 13 August 2005, concerning financing collection, treatment & recycling of waste.

2. Scope

This statement relates to all HCS Horizontal Bulk LAN cables, as detailed in Annex A.

3. Compliance statement

None of the hazardous substances as stated in the relevant EU-Guidelines are intentionally added to HCS Horizontal Bulk LAN cables during the manufacturing process.

The concentrations of the hazardous substances as stated in the relevant EU-Guidelines found in the components and raw materials used to manufacture HCS Horizontal Bulk LAN cables are well below the MCV allowed, as detailed in Annex B.

Therefore, HCS - HES Cabling Systems cables are in full compliance to the European Union Directive 2002/95/EC (RoHS).

4. Marking

As of 1 August 2005 all reels and boxes containing HCS Horizontal Bulk LAN cables shall be identified with the following label:

Sincerely,

Ergün Rıza AKAN
